TECHNICAL SKILLS

Dart / Flutter	Widget Development	GitHub
RESTful APIs	Responsive Design	UI/UX Design
State Management	Flutter Framework	
Crossplatform Development	Dart Language	

PROJECTS

Islamic Application

- Developed a comprehensive Islamic app that assists users in maintaining daily azkar and accurately knowing prayer times. The app aims to facilitate access to daily supplications and enhance adherence to performing prayers on time.
- **Technologies Used**: Flutter, Dart, Bloc, REST API, JSON.

News Application

- Created a comprehensive News app using Flutter and Dart, aimed at delivering the latest and most relevant news to users. The app features a clean and intuitive interface, allowing users to browse through various news categories, read detailed articles, and access real-time updates. The app is optimized for performance and user experience, ensuring quick access to news updates on any device.
- **Technologies Used**: Flutter, Dart, RESTful APIs, Provider / Riverpod / Bloc, JSON.

Ecommerce Application

- Created a feature-rich eCommerce app using Flutter and Dart, designed to offer a seamless online shopping experience. The app provides users with a smooth browsing interface, advanced product search. The app integrates Firebase for backend services, including authentication, cloud storage, and real-time database functionality, ensuring a robust and scalable solution.
- **Technologies Used:** Flutter, Dart, Firebase, Provider / Riverpod / Bloc, HTTP, JSON.

TODO Application

- Developed a versatile ToDo app using Flutter and Dart, designed to help users manage their tasks efficiently. The app features an intuitive and user-friendly interface, enabling users to add, edit, and delete tasks effortlessly. The app is built with a focus on smooth navigation, responsive design, and high performance, providing an optimal user experience across various devices.
- **Technologies Used**: Flutter, Dart, Bloc, SqfLite.
